So, you liked the last issue, huh? And the one before that too, judging by our sales figures. Neat! And they said it was a dying market... It's true, folks — when we launched

COMMODORE FORCE onto an unsuspecting public, industry moguls the length and breadth of Britain were heard sniggering into their coffee cups. Ha! It's rewarding to watch those same know-it-all pessimists tucking into double helpings of humble pie as this magnificent monthly goes from strength-to-strength.

It was felt, for example, that just because some of the major retail chains are curtailing their stocking policies regarding the C64, that owners of the awesome 8-bit micro would hang up their datasettes and retire. Not so! We knew all along that home computer enthusiasts weren't quite as fickle as many imagined indeed, Lloyd Mangram's still receiving letters from ex-console owners who've traded in their carts for a cart-load of cassettes

Our policy is simple: if Boots Woolies, Menzies and Smiths are stocking fewer and fewer decent C64 games, we'll just have to work that little bit harder in getting the games on your behalf. If you can't buy the suckers, we'll give 'em to you!

This simple strategy is already paying big dividends. Over the past three issues we've given our readers classic games with a combined overall percentage of, and get this, 350%! The amount of cash you'd have had to pay to buy these games would also be worth calculating, but the time I's spend totting up that particular set of figures would be better spent in

altempting to secure better games!
You've got Jimmy James to thank
for this issue's Reel Action smashes The Blues Brothers, eh? What a scoop! He's been getting more and more irvolved with securing the rights to our cover cassettes of late, and judging from what I've seen so far the lad's got a real (action) feel for it.

So, if you've been at your wits end twing to get your mitts on a particular pece of C64 software, why not drop Jimes a line at the usual address and he'll see what he can do. In the neantime, I hope you enjoy the issue. Ir fact, I hope you find time to read tle beggar in between playing your latest batch of Reel Action classics! May The COMMODORE FORCE Be With You!

n a surprise move, American software giants Acclaim have sold the rights to their current (unreleased) home computer products to Virgin. One of their biggest (and most sought-after) Commodore releases was a game called Impossible Mission. Hailed by many as a true classic, it incorporated excellent graphics, addictive gameplay and — astoundingly impresively-clear speech samples. Released not long after the C64 itself, *Impossible Mission* hasn't been available for a while.

Until now, that is — although, unless you've got a SNES or Megadrive, you can forget it. Believe it or not, Microprose have signed a deal with Epyx, allowing them to produce the game for the aforementioned consoles. So, who leads the way? He'sgot a definite Nordic look about him. All I thirk of is that horrific beard he used to have - Ugh!

So, what are we to think? Who is this individual we share an office with? After much high-tension debate, we decided to ask him. Unfortunately, he was on the phone - so we shoved a piece of paper in front of him with 'Spell your surname' written on it. Without further ado, he scribbled, writing that his real name is. Osborne. However, he barely has time to sup the sweet milk of freedom before finding out the orphanage that brought him up is to be repossessed cos they can't pay the rent. Unable to stand aside and watch this crime, the boys decide there's only one way to raise enough cash to solve the problem — to put the band back together and play the gig of their lives.

their lives.

Be sure to have a hefty supply of fried chickens and dry white toast at hand, as you help the borragain bluesmen in their quest to save the doomed orphanage from the bailiffs wrath. Unfortunately the various band members are missing and all their instruments have been swiped. Cue multi-

level, simultaneous two-player platform-leaping antics with our roguish heroes out to rescue the kiddies and raise a little hell along the way. Five different items need to be recovered if they're to succeed — a microphone, concert poster, amplifier, guitar and concert permit. One of the blighters is hidden on each level and they're a pig to find. Determined to hinder J and E's progress are hordes of policemen, cowboys and ruffians. Luckily, crates turn up along the way which can be chucked at enemies, disabling them permanently. Keep an eye out for other useful items as well. Records are fairly abundant about the levels — collect 100 for an extra life — but instruments prove a little more elusive. Occasionally, you'll come across a question mark. re you a fan of the film Wargarnes? In the movie, a young computer hacker breaks into a complex computer network and becomes involved with all kinds of trouble. Hacker is similar, but at the end of the day you won't end up creating a world-wide disaster. Instead, you're taken into the heart of a computer complex, and all in the best possible taste.

taken into the heart of a computer complex, and all in the best possible taste.

Upon loading, you'll be asked to type in a password. Don't worry if you don't input the right answer as this is all part of the game. Actually, the entire game revolves around logical problems being solved and that's why this intro is void of any intense description of the game's content — you'll learn what to do as you go along. It's this user-friendly atmosphere that makes Hacker so addictive. Still confused? No matter — there are deliberately no instructions. Just load it up and let it lead you by the hand. It's a world of top secrets, conflidentiality — a world of the Hacker.

t's tactical japes WW2-style as COMMODORE FORCE gives you the chance to re-enact the famous battle for Guadalcanal Island. You get to play either the Americans or Japanese in this fine icon-driven struggle, manipulating infantry, aircraft and shipping to achieve your goal. Now, in a gloriously-limited word allocation we'll endeavour to explain how it all works.

To get started you need to select a scenario. Number one is a three day practise battle with you controlling the US. Two gives you the full campaign on the American side and three gives you command of the Japanese.

These are your water-borne forces and they come in three categories: Escort, Carrier and Transport. Escort groups, as their name suggests, are heavily armoured and used for barrages and cover for other groups. Carrier groups include one or more aircraft carriers (effective cover in themselves), and transporters bring in supplies for

Ships are identified as follows:

CV — Aircraft carrier **BB** — Battleship

CA - Heavy cruiser

CL — Light cruiser DD — Destroyer AP — Transporter

NB Each side's harbour supplies are denoted by a column of anchors either side of the map. US units are always shown in blue and the Japanese are in red.

D FORCES

The fighting ability of your men on the ground is affected in different ways. Malaria levels need to be controlled by regular medical shipments. Leaving a particular unit in the front line too long will drag down their morale and adversely affect fighting efficiency, so be sure to rotate units and allow regular rest periods. 'Digging in' an infantry unit will double their fighting strength but render them immobile until the order 'move out' is issued.

Aircraft operate either from carriers or your base (Henderson Field) on Guardalcanal Island, Individual planes are given a codename relating to their homebase — planes based on the carrier 'Enterprise' will be known as E-1, E-2 etc. Air units based at Henderson field have the prefix CAF (due to the American codename for Guadalcanal during the conflict - 'Cactus').

ATTACK — Select target to engage.

WITHDRAW — Pull out attacking forces.

AIR — Used to launch aircraft.
The icon appears when either a

ANCHOR — Used to dock supply ships. Only available at friendly ports.

HOME — Sends aircraft directly back to their original base location at the time fire is pressed. Aircraft carriers may move in this time.

TACTIC — Toggles infantry between 'dig in' and 'move out' modes.

TRANSFER — When more than one naval units are together, selecting transfer allows ships from one fleet to be re-assigned to another.

narrowed to a cold, fixed stare, 'Flight Of The Valkyrie'

growing to a rousing crescendo, MILES 'NO **CHOPPER GAGS' GUTTERY** gets his rotors turning...

ere's the first release from the new Kixx XL range to really take advantage of disk format. Gunship on cassette was a joke, the bones of its disk parent picked dry of all but the stubbornest of gristly tendrils. Its appearance on the almost exclusively tape-orientated budget scene offered little scope for festivity. A shame really, as this classic of some years ago is nigh impossible to lay your hands on in original disk form. Well no more! Now everyone (or at least everyone with a disk drive) can experience the game as it was meant to be.

So what's it all about then? Well it's a flight sim... no wait - I can see you all now, switching over to Channel Four to watch that documentary on Eskimoes. Lay down your remote control and pay attention a while longer.

You, lucky readers, have the opportunity of taking to the skies aboard an Apache helicopter, perhaps the most awesome all-round fighting machine in the air, with license to cause damage -**BIG** damage

To kick off, enter your name on the pilot roster, then you can report for duty. Rookie pilots are advised to plumb for flight training in the States. Enemies use dummy ammo so you can familiarise yourself with the controls without getting shot down.

Once you've mastered the complexities of flying and learnt a few textbook combat manoeuvres, you're ready to tackle one of the four action theatres on offer. Of course, you'll want to wade straight into the hot-bed of Western Europe against the Ruskie hoards (remember - this game is pre-Glasnost) but don't be tempted, go for Southeast Asia or Central America first. On cassette, Gunship is a hit and miss affair. The

limited amount of options, awful multiload and lack of pilot save facility all combine to make it a piece of software to avoid. On disk, however, it's possibly the best simulation seen on the '64, and certainly the best one involving helicopters. I'm not about to pass comment on its realism - having never flown one, I'd be a liar if I did but let's just say that if the real thing's as much fun as Gunship, I could enjoy it and almost overcome my extreme fear of heights... although I must stress the almost.

If you've got a disk drive, and you haven't got Gunship, now's the time to pop off to the shop and buy it. What more recommendation can I give?

bring up an intelligence report with info on enemy hardware likely to be encountered. Last of all is a weather report. Take note, as excessive heat can limit the payload weight of your chopper

If you think you've got what it takes, accepting the mission takes you to the arming screen. Here the Apache carries a standard payload but experience allows you to decide exactly what you'll need for specific missions. Now head out onto the tarmac and get going.

rank of colonel. A spotless record leads to rapid progress through the ranks but reprimands make things a little more difficult. These are earned for 'bugging out' of dangerous missions or failure to hit objectives. Not only that, but a swift ticking off from the CO on the debriefing screen really rubs it in. However, if your performance is outstanding during a sortie, you'll be up for decoration. The Army Commendation Medal is pretty easy to achieve - then there's the Bronze Star, Silver star, Distinguished Service Cross, right up to the Congressional Medal of Honour, America's highest military accolade.

So what lifts this head, shoulders and Timotei above the competition?

The wireframe graphics (supposedly not the C64's strong suit) are very effective and move convincingly enough, if at times a little slowly. You won't notice, however, because of the incredible attention to detail in actually mastering the art of piloting an Apache. Even experienced flyers will always discover new tactics to aid the cause.

So the actual flying is very good, but the way it's implemented into the game's framework really makes it a hit. A real buzz of satisfaction is gained from being awarded a prestigious medal or that elusive promotion

Another five pages of nostalgia can't hurt anyone, and when they're as great as this... yes, welcome one and all to Back To The Feature. Well, 1987 eh? What was it like? What happened? THE LIST.

Yep, as with our first two instalments we've constructed a list of the software included, with some helpful and informative info thrown in for good measure. Want to see how the games of then rate now? Eager to obtain them? Study and learn, my friends. Oh, and by the way — the info goes appears in the following order: Game, publisher, typical mark awarded then, Force Factor now, and availability. Availability is marked on a scale of one to ten, with ten being readily available and one indicating you've got next to no chance.

BACT THREE PART THREE

don't think anyone would envy the task US Gold had after snapping up the rights to produce the famous four-player arcade game, *Gauntlet*. With hundreds of levels, simultaneous multi-user action and detailed sound and graphics, people commented that perhaps, just perhaps, US Gold had bitten off more than they could chew...

...although, the only people chewing were those eating their words, as Gauntlet was widely regarded as one of the best arcade conversions seen at that point. Understandably, the four-player option was left on the proverbial cutting room floor, but the ability to have two joystick-wielders battling away sufficed admirably. Admittedly, it was full of bugs — several annoying glitches reared their heads after a while's worth of play, but fortunately didn't cripple the game in the fashion you'd expect.

 Like the arcade original, Gauntlet allowed you to choose from four different characters. Nice beard, man.

Gauntlet didn't grip me in the way it did others. I felt that, once you'd got through so many levels, you'd seen all the game had to offer. That wasn't a criticism I'd aim solely at the C64 version — even the arcade original was limited. Feel free to disagree, though...

Whereas Gauntlet's subject matter was it's downfall (in my opinion anyway) Starglider's was the C64's lack of processor speed. You see, while the Commodore undoubtedly - the cream

of the 8-bits, it has problems coping with the complexities of vector graphics. Starglider on the 16-bits (and the Spectrum, for that matter) utilised them particularly well - the '64 didn't, it's as simple as that. Before you all flock onto the streets, grief-stricken by the lack of competent conversion, take solace from the fact that the game was, in essence, a pretty insipid outing. Developed by Realtime Software and published by Rainbird, it saw you flying along a planet surface, shooting vector enemies and, well, flying and shooting some more. Enjoyed and rated well on other formats, I felt it - and let's not waste words quite frankly, boring. The C64 version just added a snail's pace speed to the tedium, and the marks it received reflected this.

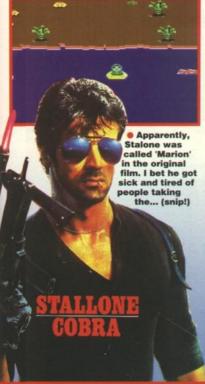

Another disaster (only more so) was Cobra, Ocean's game of the film. On the Spectrum, it was an enjoyable (but tricky) platform shoot-'emup—the C64 version was anything but. ZZAP! awarded (or should that be condemned?) it with a 13% overall rating; from what I've seen of the game, I've no reason to disagree with them.

Covertape patrol

From the dismal to the desirable, **Activision**'s *Park Patro* was an exceptionally enjoyable arcade romp. But hey — you'll know this already, having received it on last month's covertapes. Who can say we don't give you the best games? What other... (snip! Normal service will resume after the COMMODORE FORCE team have recovered from this sudden burst of gratuitous self-congratulation. Sorry!).

One of the best plan-view games — shame they bore me so badly.

JE WILLIE

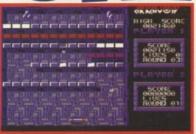

Piranha's Nosferatu took the isometric 3D perspective and added distinctly gothic graphics and plot, in this tale of vampires, stakes and arcade-adventuring. Both absorbing and thoughtfully designed, it incorporated some of the best graphics the genre had offered to that date (albeit in tasteful monochrome), and surprisingly had the gameplay to match. A few months later, it was to be surpassed in it's genre by one of the best games ever, but you'll have to wait a while to find out about that...

Did I say earlier that the C64 can't cope with decent vector graphics? **Microprose** seemed oblivious to this when they released their accurate helicopter simulation, *Gunship*. As it's included in our special **Kixx/Microprose** pull-out special this month, I'll say no more — other than the fact it's great, an' I like it lots. It's also our Rave Review.

If you want to know more about Gunship, turn to page 12 and learn...

With Amiga Public Domain games, there's a word that's used almost incessantly — namely 'tribute'. A 'tribute' is a game that duplicates another, often commercial, piece of software; sometimes to the point where you'd expect legal action to take place. Arkanoid is one of the most 'tribute' ed games I've come across, but the real irrony is that it itself was inspired by another game (the ancient Breakout). Adding power-ups to the simple, block-busting (but not in the superlative sense) action was an intelligent decision by the creators of the arcade original. Obviously, due to the basic nature of the arcade machine's code and graphics, it was a simple game to convert. Like

I'm hitting the ball, but it gets too fast. An' I say 'slow down', but it won't. Bah.

Gauntlet, the C64 version was restricted by design (I mean, the gameplay's so basic it's almost insulting) but it was rated well at the time for being pure, uncomplicated fun. I reckon the ball speed wasn't pitched quite right, though — it seemed to speed up a little too quickly.

Aliens was hailed as 'the best film tie-in to date' by ZZAP! and I'm inclined to agree with them. Rather than make the game a basic, multi-level shoot-'em-up (as is usually the case), Electric Dreams choose to utilise a first-person graphical perspective, with a mixture of exploration and Operation Wolf-style shooting making up the gameplay. The atmosphere was as tense as you could have hoped for from a conversion: I'm sure James Cameron (the film's director) would have played it...

Look guys — I know I asked for a hug, but this is taking things a little too far...

Also using the first person perspective, but receiving a less-than-favourable response was Explorer — again, by Electric Dreams. It's programmers (the Ram Jam Corporation, if you're interested) created a game of extreme exploration, where you searched through 40 billion mapable locations in search of nine missing spaceship sections. Unfortunately, most of the locations (although pretty) looked the same, making Explorer the computerised equivalent of finding a needle in a haystack.

Wander around a maze, run out of keys, die. What an interesting game.

Into The Eagles Nest was a plan-view shoot/explore-'em-up with clear, colourful graphics. It did little for me — there was too much wandering around for my liking — but it would seem I'm in a minority. Receiving a typical mark of 90%, it's a game that will appeal to fans of the genre — sonething I'm not...

Point 'n' Click...

Activision's Manic Mansion was an arcade idventure of a different kind. Rather than ifrectly controlling your character, you pointed to the area of the screen you wished to be noved or manipulated. This type of game has hrived on the 16-bits, where the graphical wapabilities of the machines makes for attractive and interesting gameplay. This was in early attempt and, for the C64, an admirable schievement. Sadly, and as far as I know, it whily appeared on disk — hopefully, someone will re-release it at some point...

Aliens US hit the C64 world, courtesy of Activision. This conversion of the film was the second to be seen on the C64, although undoubtedly the lesser of the two. A multi-level game with a variety of game styles, it's most noteworthy aspect was it's presentation — although in a way this contributed to the game's downfall, by increasing the harshness of it's multiload. Another problem was that the subsections were pretty insipid, and didn't really 'glue'; everything had a feel of being thrown together.

Time for a little controversy (sort of). Auf Wiedersehen Monty was the third in the Monty Mole games, and was regarded by the ZZAP! crew as the least palatable. Essentially a arcade adventure/platform game hybrid, it detailed Monty's escape from the notorious Intermole (Interpol... Intermole... Geddit? Not very good, eh?) to his luxury island off the coast of somewhere or other. So, plodding through the various screens making up countries, you'd be confronted by graphics that were (sort of) drawn accordingly.

I really enjoyed Monty, though. Although it didn't quite have the charm of it's predecessors (brilliant in their time), it still presented a more-thanadequate way to spend an afternoon or five.

Yeah, it looks like a Spectrum (RIP) game, but it's still fun to play. Honest!

Ocean dealt an ace card in the form of Sensible Software's superlative Wizball. Gary Penn of ZZAP! enthused 'Simply brilliant — one of the best presented, most graphically and aurally attractive and addictive pieces of software available'. Another point worth mentioning is that, after awarding it with 96%,

awarding it with 96%, the ZZAP! offices were inundated with complaints about the rating: readers felt it to be too low! A rare occurance indeed.

I-Ball, Firebird's inspired blasterama, arrived and pleased everyone with it's enjoyable gameplay and many power-ups. Again, there's not much point in telling you about it, as you'll already have played it extensively after receiving it on Issue Seven's covertapes.

Barbarian from Palace was a wonder to behold.

A hack 'n' slash game that saw you chopping opponents to bits with an impressive sword, it had to be one of the goriest offerings of 1987. Despite the fact it was limited to

moves to implement made it astonishingly compulsive; more so with it's simultaneous two-player mode. Everyone's favourite move had to be the bloody-but-satisfying flying neck chop which, if executed correctly, would decapitate your opponent. The presentation was of an equally high standard; once one of the competitors had been killed, an 'orrible little

one-on-one combat, the amount of

creature would emerge from the side of the screen to drag the corpse away.

However, such violent antics

aren'ft tolerated by everyone, as apparently (or so I've heard) German censors felt it a little too nasty for their population, and subsequently banned it. Another controversial aspect of it's release, was a series of advertisements (not to mention the packaging), with Page Three model Maria Whitttaker wearing very little indeed. The fact that the male model (incidentally, Wolf of Gladiators fame)) was wearing just as little seemed to go over the top of most (complaining) people's heads. Excuse me, but isn't that sexism? Perhaps that's something best left to another (more relevant) magazine to discuss...

I've got a bigger sword than you. Oh yes I have. And I'm harder. So there.

The Great Escape was an isometric 3D arcade adventure, where the gamesplayer attempted to abscond from a WW2 prisoner-ofwar camp. This could be done in a variety of ways, via several

varied methods.

Virgin's How To Be A Complete B****d was a 'conversion' of the moderately amusing book, co-written by Adrian Edmonson. I'm by no means a prude, and I can't remember the last time something really offended me, but How To Be ... was an altogether nasty piece of software. Not in the way of it's rude words and risqué content though - far too tame for my liking - but in the way that it was almost unplayable. If I remember correctly, a few people got a bit upset about it, but really,

This dispensing of the usual all-too-linier approach made TGE something special - it's just a shame it was ported across from the Spectrum (or so I'm told), leaving the graphics distinctly monochrome. However, they were very good - not to mention detailed - so it's a forgivable offence.

Perhaps Escape's greatest element was it's atmosphere. If you let go of the joystick for a certain length of time, your character would become computer controlled, and would continue with everyday activities, mingling with both guards and other prisoners. To my knowledge, it's the only game that does that, and was particularly handy while waiting for nightfall, 'cause you could nip off for a cup of tea and let the computer hold the fort for there's nothing that this game has that can't be seen or heard in a playground. Well, apparently.

So I can't say the name of the game because it's rude? Darn.

Foot in mouth?

1987 saw the release of the best isometric 3D game ever - Ocean's wonderful Head Over Heels. Novel in the respect that you controled two characters and could switch between them, it threw clever puzzles at awestruck gamesplayers.

By joining your two subjects together, you'd be able to move them as one and utilise their various abilities. Individually, both Head and Heels had weaknesses - Head could fire at bad guys and manage large, gliding jumps but was painstakingly slow, whereas Heels could carry objects and run quickly, but couldn't jump very well.

Don't dismiss it 'cause it's black and white - Head over Heels is a classic.

Getting through the game's 250-odd screens relied on you knowing when to separate, what ability to use and how to go about it. In fact, there's just so much to the game, that I can't do it justice in the short space available - suffice to say it's the best arcade adventure ever. Perhaps the only critisism I could level at the programmers is that they nearly released it as Foot and Mouth - I mean, what were they thinking of?

Infulating and ill thought-out arcade adventure.

I've heard about a game called Freckles. Older readers will have too.

Whereas Don Prestley's Trap Door (featured last month) and Popeve used extremely large and colourful graphics to optimum effect, Flunky (published by Piranha) sadly failed to recreate their playability. As a flunky to the Royal Family (hence the title), you'd have to complete various tasks for your employers, solving a myriad of puzzles along the way. Unfortunately, these were too darn obscure and/or just plain tricky to execute, making Flunky a frustrating and unrewarding game to play. The presentation was, as expected in a Priestly game, of an admirably high standard sadly, behind it lurked an unplayable, insipid arcade adventure.

bubble-belching coin-op, was an example to all people involved in the production of arcade conversions. As well as being almost obscenely playable, it also offered a nifty two-player option and a fair amount of levels

moved onto the next

On a more obviously-violent note, there was Imagine's Renegade. Kicking heads, kneeing groins and other violent actions were actively encouraged in this coin-op conversion. With five levels and screenfuls of thugs to get through, Renegade was an enjoyable beat-'em-up, with it's only real fault being a slightly easy difficulty setting. This wasn't a problem with Archer Maclean's International Karate Plus (or IK+, as it was known). The best fighting game ever seen on the C64, it took all good elements of the one-on-one combat offered by it's predecessor, and added a novel twist - a third competitor. Couple this with stunning graphics, animation and Rob Hubbard soundtrack, and well - what more can I say?

Red guy: 'Ooh, me piles. You heartless swine'. Blue guy: 'That's it - I'm off'

The Shoot-'Em-Up Construction Kit is, and I defy anyone to argue with this, the most well-presented, comprehensive and easy-to-use utility available for the '64. With an astonishing amount of options to make your masterpiece with, even the least talented of programmers can come up with something moderately playable. Every day, we receive two or three games written using it, with the authors hoping to get their (often quality) efforts onto Reel Action. Then there's Alf Yngve, who's taken the program and pushed it to it's limits - to the point that some of his SUECK games are of commercial release standard. In 1987, SUECK was released, courtesy of Sensible Software (it's programmers) and Outlaw (it's publishers), and if you haven't got a copy by now, perhaps it's time you did. Think of it this way - you're not just getting one piece of software, but as many as your imagination can create...

Joe only gets a small mention. Serves him right for having such a stupid hat.

Finally, one of the year's biggest bargains had to be Joe Blade from Players. At £1.99, it's mixture of arcade adventuring and puzzle sub-games combined to make it a real catch.

So, that's 1987 over with. Next month, we're covering, well, 1988. Apart from being an obvious progression, it's also good for everyone concerned — '88 was a killer for quality software. Want to find

POM-BEARS! Seems like only a month since I saw you last — uncanny really, because I don't actually get to see you. Still, you'd never quess what, but I walked into my house the other day only to discover it was Noah's Ark. All I could do was helplessly watch groups of animals file in through the front door. I didn't mind at first, but the novelty wore off; checking my boots for scorpions, escorting monkeys off the apple trees and retrieving the cat's tail from a pair of famished lions soon becomes tiresome. In the end, a big food chain developed in front of my very eyes, which left one huge bloated killer whale in the driveway. Unfortunately, I ran over the poor beast while I was trying to park my car.

ute games don't come much cuter than this, and it's addictive qualities earned it 84% back in Issue Seven. Here's a quick guide to what should and should not be done.
It's best to leave the enemies well alone until every flower has been collected — this way you can collect the 'EXTRA' letters that appear when killing a baddy.

alone it will change, so don't hurriedly collect them as soon as they appear.

On later levels, Nessie creatures rush at you like homing missiles. To avoid them, build a ladder and

step on the first rung — they'il get totally confused. Before using a teleporter, keep an eye on where you're heading, as the nasties have a tendency to lurk around the destination area.

To defeat the crocodiles, start off on ground level. Don't bother climbing up, as they'll come to you. Take out the smaller crocs before they get a chance to creep up, and beware of the last two crocodiles their attack rate is doubled. Killing all the crocs on one side first is the best tactic to use

When facing a whale, use a ladder to reach it's

around twenty hits.

To kill off an elephant (so much for human compassion), avoid the platforms. Before it plummets down to earth it hangs in the air, giving you chance to get clear. As it lands, repeatedly hit out. Elephants require 30 hits.

It's been a while since I printed a fat bundle of pokes, but when all looked bleak on the cheating front everybody seemed to go a bit haywire. I've now got reams and reams of 'em. so if you've got an **Action Replay**, get a load of these...

MEMORY

Action disks on my 128D, and I thought the solution I discovered may interest other my machine, including an RS232 modern and

removing this stopped the problem.

On a separate issue, where can I get the CP/M disk on my 128? Can I get other software and books on CP/M?

J J Malinowski, Lincolnshire

Firstly, peripherals like the RS232 modem can interfere with the operation of software. This is particularly true with software that's been compacted to save space. When the file is decompressed to it's original length, it may use the cassette R\$232 memory buffers or alter control signals to the ports. The conflicting signals (eg the modem saying it's there and the memory location saying it isn't) is what causes the problem.

Secondly, CP/M is a language designed for business software and early PC machines. The Commodore 128 and 128D (with built-in disk drive) have a CP/M mode that allows you to run software written in CP/M. However, software is very scarce. Try contacting the Independent
Commodore Products User Group. They can supply FREE PD and CP/M software for all Commodore machines. Write to:

Professor Brain Strain, COMMODORE FORCE Impact Magazines, Ludlow, Shropshire SY8 1JW

0)11 **PUTTING IT ALL** TOGETHER

month, I, Professor Brian Strain, give you more vital information on how games are made, starting with one of the most crucial features -Sprites. This month, I'll look at the many memory locations used to control sprites, starting with changing and moving sprite 0 (the C64 can have up to eight sprites on-screen, numbered 0-7). By the way, if you've ever seen programs with more than eight on screen at a time, it's due to a clever programming

Following on from last

THE POWER OF V

later in the series.

trick which I'll introduce

To save time remembering hundreds of rumbers, we can use a shorthand form of each memory location. All the locations are from 53248 onwards. So, by setting the variable V=53248, we can use V and V+1 to represent the horizontal and vertical co-ordinates; much easier to remember than 53248 and 53249 isn't it?

DATA

To tell the computer where the data is, we pike location 2040. This is the SPRITE LATA POINTER, one of eight. To access one c 256 sprites available, you should use this FOKE

POKE 2040, LOCATION/64 sored the sprite data. For this first program, use location 12288, to give POKE 2040,192

PLACES EVERYBODY

Imagine the screen is a large grid of 40 by 25 characters, each made up of eight pixels (picture elements). This gives a horizontal the visible area and moved into view (so that it doesn't appear out of mid-air).

The problem, is that each memory location can only hold a number between 0 and 255, while the sprite's horizontal co-ordinates (or X position) can range from 0 to 347

Vertically, the range is 0 to 255. Using these lines, you can position a sprite anywhere.

X=x co-ordinate: Y=y co-ordinate IF X 256 THEN X=X-256:POKE V+16, 1 POKE V. X

POKE V+1, Y Try various values of X and Y in the program below to see the effect. If you're interested in mathematics, location V+16 is the most

significant byte. It means that if the location is set, the sprite's X location is actually over 256

Quite simply, location V+39 controls sprite 0's colour. POKE it with values from 0-15

To double the size of your sprite, use the following POKEs (to return to normal size, just POKE the same location with 0)

POKE V+29, 1 doubles horizontal size. POKE V+23, 1 doubles vertical size.

Use both of the POKEs to get a sprite that appears twice as large as the original, but note that it's only the pixels that have doubled in size, not the amount of memory and detail

Of course, it's no good doing all these POKEs on their own, as they'll just alter the sprite without actually displaying it! To turn on sprite 0, use the following:

POKE V+21,1 and to turn it off, POKE V+21.0 effect the sprite, let's create a short program to display one. You can after the numbers in lines 50 onwards to change the location, size etc of the sprite (a simple floating

8-PAGE PULL-OUT SPECIAL! CROPROSE GALORES
The best of budget of reviewed!

32 FAURE

BARGE BARGE

Missed a recent game during its rounds on the full-price market? Count yourselves lucky, because there's a good chance the very game in question is having a whale of a time on a budget label. One company responsible for bringing the fruits of full-price software onto the bargain shelves (and ultimately, your homes) are Kixx. Have you heard about the Microprose games they publish, including the ones under their glossy new Kixx XL label? Perhaps you ought to read on and learn...

very day at COMMODORE FORCE we receive a cornucopia of letters. More often than not, they're from readers who understandably, are annoyed at the steady decline of new, full-price titles. However, in their state of frustration they're prone to forget the immense amount of software that's available at a budget price. Why pay a tenner or more for a sub-standard new release, when many superb classics can be bought for half the amount? It sounds like a stupid question, but it makes sense to check out the budget scene as — undoubtedly — there are probably hundreds of games you've never even heard of and yet are fantastic all the same. One company that have been major contributors to the budget cause are Kixx, who have teamed up with countless top software companies to bring exciting games to the shop shelves at unmissable prices.

One close ally that Kixx have worked together with are Microprose. Renowned for there superlative simulation and strategy games, Microprose have released a cascade of impressive titles to date, all of which can now be sampled thanks to Kixx.

Hey! Read all about me on page 12 this month — I'm the Rave Review, you know.

One such remarkable game (and it set the simulation standards in its heyday) is Gunship, a revolutionary 3D sim where you take command of an AH-64A Apache helicopter through five war-stricken areas of the world. Featuring an alarming array of cockpit dials and gauges, deemed impossible to cram into the '64's memory, Gunship's interactive possibilities surpass umpteen amounts of games that dare label themselves as flight simulations.

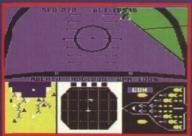

• 'So where's the review?' we hear you cry. Errm, tune in next month, folks!

Project Stealth Fighter is also a remarkable aerial jaunt. When it first appeared, it received an amazing 96% from the team of ZZAPI 64. That's not a mark to be taken lightly, and if reviewed today it's more than likely the same acclaim would be given — it's still faultless in this day and age. Just picture the scene — yourself in possession of Gunship and Stealth Fighter. Yearn to be the person who lives the reality? Then hunt them down!

See that plane? I can't fly it. I've tried and tried, but it keeps on crashing. Bah.

Continuing across the skies of success are three more Microprose flight sims; Solo Flight — 1930s mail delivery via light aircraft, F-15 Strike Eagle — doj-fighting supersonic style and Acrojet — stomach churning sturit flying.

Nightmare. I can't fly this one either. Lookout below, I'm comin' doowwn...

Not only are they the kings of the sky, but Miroprose have turned their attentions to games of completely different nature, *Microprose Soccer*

Hi to everyone at Sensible Software — you'regonna loose badly guys. So there, being one of their most successful releases to date. Created by veteran programmers Sensible Software, Microprose Soccer still stands as being the game for terrace-based fans. 'The best overhead footy sim we've seen' was one particular quote from the frequently-mentioned ZZAP! 64 team, and thanks to Kixx, you can now pick it up

for next to nothing.

Silence is golden

Of course, an old dog always likes his old tricks (I think) and the strategy elements are reintroduced in *Silent Service*, a submarine simulation with a distinct authenticity that both deep-sea buffs and adventurous landlubbers will enjoy. Set in World War 2, the basis of *Silent Service* is to hunt down and destroy Japanese vessels patrolling the South Pacific. Realism is an essential component if a simulation is to handle as life-like as possible;

As the last caption was about Soccer, am I allowed to make a sub gag? Darn.

6 FATURE

Silent Service has all the modifications of the sub it emulates, coupled with the tense drama of the period setting. With the extensive range of options and nautical manoeuvres to experiment on, this ranks as one of finest simulations to grace the Kixx range.

The great Rick D. observes a fine example of neo-veusian pillar-building.

When you think of action heroes, there are many that spring to mind. Just walk past a newsagents or video rental store to see courageous legends of past and present in all their glory. Computer games have also spawned champions — many idols of today are characters from best-selling software. The '64 has many bastions to raise aloft the 8-bit flag, and there's no one tougher than Rick Dangerous, who appears in two games on the Kixx label.

His first outing, simple entitled *Rick Dangerous*, is arguably one of the best platform/shoot-'em-ups around. Rick's unquenchable thirst for adventure leads him into a barrage of deadly situations — dilapidated caverns, hostile native warriors and devious traps and puzzles.

Rick's antics continue in the aptly-named Rick Dangerous 2. Featuring even more ferocious pitfalis to outwit, RD2 is proving to be a huge success on budget; just look at Issue Eight's Rave Review — 92%! Unaware that Rick even existed? Then get hold of a copy pronto and see what the fuss is all about. If you still hunger for more adventure, there's Airborne Ranger, which combines shoot-'em-up action with mind-blowing strategy and offers an impressive twelve missions.

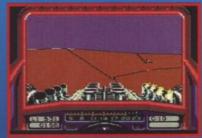

Heroic antics ahoy — it's Rick again! Go on Rick — give 'em one from us...

Kixx cater for everyone, and those who fancy a bit of hair-raising racing aren't left out, because Stunt Car Racer offers a lot for driving enthusiasts — and more! The object is simple — at least, in theory — as you have to drive around eight dangerous stunt tracks and progress through a league of four divisions. Each track is realistically portrayed in stunning 3D, and plays like a fantastic roller coaster ride. Gargantuan gaps, immense ramps and, believe it or not, some seriously scary

stepping stones stand in your way (or should that be car?) of victory. The problems are increased by an opposing computer-controlled car.

Stunt Car Racer qualifies not only as the best (and fastest) racer, but it's one that takes the '64 beyond the boundaries imposed by Commodore sceptics. For sheer thrills and spills, this is unrivalled by anything else — it'll definitely keep you on the edge of your (bucket) seat.

What a phenomenally large engine. I hope these people use unleaded.

3D Pool is another Kixx game set for the elusive title of 'classic'. The play area itself is stunning with the pool table twisting and turning at your every command — a programming accomplishment and a pretty hot title too. Gone are the days of pool games in pubs when you'd unknowingly jab someone in the eye whilst trying to get a tricky shot — 3D Pool contains all the authenticity while adding extra elements, and all without upsetting some burly-looking biker...

3D Pool — a game that manages to involve a load of balls, without being...

So there you have it a collection of superb games wrapped up by Kixx and available at some of the best prices around. Of course, if you're having trouble hunting a particular title down (although every one is worth getting) why not try your hand at winning them! After all, if you want your Kixx, you gotta be prepared to do anything...

fter reading our exclusive Kixx feature, you'll no doubt like to get ya mitts on every game included. Well our advice is to get down to your local C64 software emporium with a pocket-full of dosh and buy 'em! Or better still, grab the blighters for free by entering this, the latest unbelievable COMMODORE FORCE giveaway.

In next to no time you could be heading into battle aboard your very own Apache gunship, flying a top secret Stealth Fighter

SOFTWARE FOR GRABS or screaming around rollercoaster courses in a stunt car.

One lucky reader will be laughing all the way to the Leeds with enough software to make Arfur Daily an honest man. That's a full twelve games, complete, and in their entirety.

Unfortunately, there can be only one winner, but fear not. Nobody leaves empty handed (apart from the losers!). Ten runners-up will receive three games of their own choosing from those featured. Just remember to say which on your entry.

Now touch your toes and tell us that ain't a

ruddy good deal. So, onto the most important bit — how to win. It couldn't be simpler! Just match up the vehicles/items below with the Kixx game they

Microprose Soccer... You'd better believe it. What with the embarrassment that is our national team, the COMMODORE FORCE lads vent their footy frustrations in one of two ways. A favourite pastime of ours is to wander upstairs into the SEGA FORCE office to kick a few Mega Drives around (highly satisfying). The other way is to play the aforementioned timeless wonder, Microprose Soccer - widely accepted as the best footy sim to grace the C64.

We at COMMODORE

bananas around here
(except James — he's more
of a pomegranate).

Anyway, just to prove we're not all talk and no action, we've decided to put our money where our metaphoric mouths are.

Two readers (that's you lot) will have the esteemed honour of an expense-paid trip to Ludlow where the lucky fellow(ettes) will get to challenge the FORCEers, some Kixx bigwigs, and a couple of chaps from the holy house of Sensible Software who made it all possible (by programming the game in the first place). When the half-time whistle blows we'll provide lunch and refreshments.

To stand a chance of visiting the FORCE club, all you have to do is write in and tell us exactly why we should pick you. Remember — you'll be up against professional gamesters. I mean, we're talking premier league material here! If you turn out to be a right pigs bladder on the day you'll be the laughing stock of the entire nation, so make sure you're up to it.

Not only will you get to meet the gang and receive a guided tour of the hallowed offices, you'll also gain instant stardom.

The day's events will be covered in a future issue with loads of photos, to show how badly you were defeated (you couldn't possibly win, could you?) which means your face will appear on shop shelves world-wide.

I would like to know how I go about ordering aterial, disks or tapes. Can I order through

I was interested in getting a copy a *Nick* aldo's Championship Golf but I'm not sure

Also, approximately how long would delivery ake and what are the P & P charges?
I'd like to subscribe to your magazine. Do I need to use the form provided in the mag or an I just send a cheque?

can i just send a cheque? Peter Saliba, Ingle Farm, S. Australia

I'm sorry to hear you're having such a hard time getting '64 stuff. Fortunately, your luck's in. COMMODORE FORCE just happens to be offering the chance to obtain some of the best C64 tilles at staggering knock-down prices. Turn to page 56 for the gen. If you still can't find what you want, there's always the Plaza. Details of postage costs are on the coupons.

If you don't want to chop up the mag, just photocopy the subscription coupon and fill it in as normal.

There — the FORCE satisfies another needy soul.

You lot again, eh? What a blinking month this has been, I ask you console, console, console! That's all people seem to want to write to me about these days. I **KNOW** console games cost ten times as much as C64 software, and so does every body else. Let's have

some interesting opinions and insights on OTHER TOPICS.

Right, moan aside, I'll move on - I think I hear the postman knocking...

BAD AD

Dear COMMODORE FORCE,

I'm surprised to see in Issue Seven that you're still advertising MJC Computer Supplies, as I found out they're no longer trading as of the beginning of May

My son and I have lost money ordering computer software that hasn't been supplied. We ordered Street Fighter 2 in April

We did, however, receive an invoice from them to say the goods would be sent in 10-14 days. When they still didn't arrive, I rang them and got an answering machine stating they were no longer in business.

and didn't receive it.

I'm not blaming you in any way, but I was very surprised to still see their advertisement in this month's magazine. Surely you should vet your prospective advertisers more carefully to make sure they are legit. I'm sure more people will order from this

month's magazine and receive nothing. Surely you have some responsibility to your readers to give them the best in all aspects of the magazine.

M Livingstone, Croydon, Surrey

Certainly, we have a responsibility to our readership and we always vet material before it appears in the magazine. What you must

remember, however, is that the magazine is written and designed quite some time before it actually makes it onto the shop shelves. Therefore it's more than likely MJC were still in business when the ad was booked, but by the time they went under, it would have been too late to alter the mag.

To avoid disapointment, it's always wise to check with the company you're ordering from first. That way you can make sure they've the item you want in stock and, during this day and age, that they're still trading.

ELUDED BY

Dear Lloyd

Just as the Peugeot Lion is going from strength to strength, so is COMMODORE FORCE.

I've written to you about three matters which concern myself and, I'm sure, other readers. I'll start on a light-hearted note about your Forcefield Plaza. I'm a devoted fan of footy management games, from the ancient Kenny Dalglish Football Manager on the Speccy and '64, to the mighty Premier Manager on the Amiga. After starting off with Kenny's and then getting Football Manager with your mag, I was intending to send away to Forcefield Plaza for more. I eagerly flicked through the pages until I came across a problem. The objects of bewilderment were the codes and the order forms. There's a code for everything, so what I

want to know is do you need a code for each game you want and do you use the order form supplied?

My second point is about game formats (i.e cassette, disk and cartridge). I was reading through my copy of ZZAP! when I came across a review of the adventure of adventures. This totally awesome and stunning game was, of course, the superb Elvira 2, earning 98% for graphics and 94% overall. Already I had ideas of owning this game. I would make it it's own cabinet lined with velvet and with a golden plaque adorning the front. I was racing through the clouds only to be brought back down via a particularly gruesome crash-landing. I couldn't believe what I'd just read. I rubbed my eyes and looked again but sure enough, there were the condemning words — disk only! My heart broke with a dull crack. I was, as the saying goes, up the creek without a disk drive. You can't imagine my disappointment. Then my feelings turned to anger. What had happened to a cartridge version — was I missing something here? Alas, no. Fate had run it's course and the game and cabinet were never to be seen. My point is that software houses should wise up and start supporting cartridges more, as they're clearly the best!

I was also wondering if it's easy to program footy manager games, and if so, could they be done in BASIC if you left out the animations?

After all, there are hardly any graphics involved — it's mostly adding and subtracting large amounts of money.

Chris Patton, Co Down, N Ireland.

• It's a shame, but the C64 cartridge market has simply never been exploited in the way it should be. Okay, so only the big software producers have the facilities to produce games on cart — even so, it looks like a missed opportunity to me. That's just life, I suppose.

Oh, by the way — I've played Elvira 2 and believe me, it'd be more trouble than you could possibly imagine on tape. The lengthy accessing during play is annoying even on disk. Perhaps you should consider investing in a disk drive...?

CHRISTMAS NUMBER ONE

Dear Lloyd,

People say the C64 is losing it's popularity.
Trat's worse than the telephone scandal that hit some well-known Royal Family recently. I know for a but the C64 is as good as ever. Why do I say that? Well I'll tell ya!

Wy local stockist told me the C64 Terminator 2 pack was their biggest-selling product at Ctristmas. Not only that, but another shop told me the same pack was their biggest seller. Also, they've a wider selection of games for the '64 (aound 500+). Both shops do repairs (not that any ned doing, unless you've an accident with your beoved '64). So I think the writing is on the wall—the '64 is better than the Segas and Nintendos.

Right then — now for some questions:

Have you heard of Music Maker? I heard it's orthe Terminator 2 cartridge, but it's as hard to get hold of as it's having your letters printed in COMMODORE FORCE!

Music Maker is on the T2 cart, but there are better programs available from Public Domain. Gve Binary Zone PD a ring on 0905 779274.

2) If I wanted to buy something from the
Forcefield Plaza, would I send you an Irish postal
orler and what charge would there be for postage
& tacking?

Sive Database Direct (our trusty Mail Order company) a ring, and they'll be more than plased to answer your enquiry. You can reach them on 051 357 2961 during usual office hurs.

I) Does the Turbo Datacorder load games gicker than a standard datasette?

No, it's not faster — just a bit more reliable.

4) Why doesn't somebody do a good shoot-'em-up game like level three on Turrican 2 — it's the best I've ever seen.

The stunning SWIV is probably the best shoot-'em-up available for the C64. You won't be disappointed.

5) Is there a Commodore club here in Ireland? What's the address?

If anyone knows of such a club, write in and we'll spread the word.

6) Where's 'Shrophire'? (Look at the address for the mail bag in Issue Seven).

Alright clever clogs, one little mistake!
7) Is there a Mail Order company in Ireland

that sells C64 games?

Try the Forcefield Plaza on P64.

8) Do you like President Mary Robinson? The Queen does!

I've never met her.

 Do you play the keyboard? I do, I like music! I enjoy a tinkle on the old ivories now and again.

Questions 6, 8 and 9 are silly because I know where Shropshire is, everyone likes Mary Robinson (I think) and if you can play a keyboard, I'm better than you, I know I am, I'm sure I am.

I've only been buying COMMODORE FORCE since Issue Five, so I thought you might like a few of my first-time buyer comments:

It's great, snazzy, informative, colourful, enjoyable, fab, Reel Tapes, it beats Format's effort and it's a down right good read as we say in Co Wexford.

Up ya boyo's

Steven Boyd, Enniscorthy, Co Wexford. • What a rambling letter. I feel quite exhausted after reading it. C64 number one — did you ever doubt it? I suppose it goes to show there's a few good times in the old codger yet.

A QUESTION O SPORT

Dear COMMODORE FORCE

I'd like some information please on sports games. You seem to do a lot of previews on shoot-'em-ups and platform games but I've not seen any on sports games - maybe I missed them?

Well, getting to the point, I'd like to know what's the best football game for the C64. Oh, and the same for ice hockey, American Football and Cricket

Why are the graphics generally so bad on the C64? Surely they can do better?

Football Manager is excellent, but it's not a simulation game - it's more a board game. I'm looking for an extremely good simulation that'll stand the test of time.

Hope there are some sports buffs in your office. Mr M Livingstone, Croydon, Surrey

If it's a footy game you want, you can't go far wrong with Microprose Soccer or Emlyn Hughes International Soccer. The latter actually caused a storm of protest from fans when a certain FORCE reviewer gave a less-thanoutstanding review.

American Football-wise, your best bet is probably Cyberball. Admittedly, it's a futuristic

version of the sport and it's hardly outstanding, but there isn't much else to speak of. As for ice hockey and I'm not aware of any sims worth the tape they're recorded on - oh well...

To see some excellent graphics, check out Flimbo's Quest, Outrun Europa or First Samurai - all stunning examples of what the C64's capable of. Unfortunately, not all programmers are prepared (or able) to put jp the effort. LM

DEATH TO BILL

'Excellent Adventure' and 'Bogus Journey'. Look it's plain and simple; you have the best mag in all the universe. You've got all the hottest games (Dark Fusion was the best covertape game ever), and just to top it off you gave us Spindizzy amazing, dude

Anyway, I read Steve's editorial last ish about the brilliant competition. I'm not complaining about the tiny price rise of course, but I'll do the compo anyway.

As you know, I can travel back in time, so I'd

hop into my phone box and zoom back to the 1300's. Back then, four pence was worth piles of

money, so I'd buy a Porsche (if they were invented) and party like crazy, man.

So. Lloyd, what do you think?

Not a bad idea, eh? If I travel to the 1300's soon I'll get you an ancient copy of the brill COMMODORE FORCE if you like.

Oh yeah — keep up the good work and tell Steve to give you all a pay rise.

Colm 'Bill' Casserly

Er, party on dude an' all that, oh never mind. You're right about the covertapes though, and believe me, they're getting better.

As for the other bit - your idea is, well, awful. I'm afraid you totally don't win anything. With that I'm going to end my reply, before the sad Bill 'n' Tedisms get out of

L 'excellent' M

Dear Lloyd,

I used to own a Spectrum (I know, crazy isn't it?) until it broke down three times. Anyway, I still miss some of the games, which is why I'm writing. Please, please, could you tell me where I could find Colony and Back to Skool for the C64 as I've been looking for them for years. I've tried car boot sales, but with no luck.

Still, I think this mag is the best.

My mum says that if you put any more dirty pictures in I won't be able to buy this brill mag again - so there.

Jeff Andrews, Chesterfield, Derbyshire

If you're having trouble getting hold of software, try the Computer Cavern on 0628 891 101 or our very own Forcefield Plaza (hasn't there already been a plug for that? - Ed).

As for the 'pictures' - airight, we promise not to do it again. Just remember this -

the levels of nudity in COMMODORE FORCE are nowhere near the extent of certain magazines to be found on newsagent's top shelves. With all this talk about us being too risqué, it's no wonder the shop keeper gives me funny looks when I go and buy my FORCE copy. Still, I am usually wearing a paper bag over my head.

Dear Lloyd.

My sister has a C64 and I bought a light phaser for it. The light phaser is a Cheetah Defender '64 and it came with a 'Light Fantastic' upgrade pack from Commodore. Anyway, the games which came with it are a bit pathetic to say the least, but I still enjoy playing them. Please would you send me a list of other games

Elinor Young, Clwyd, N. Wales

I'm sorry to say the Cheetah light-gun never really took off. In fact — as far as I know - there aren't any compatible releases available, other than those in the actual pack. Sorry!

THE FINAL COUNTDOWN

Dear Sir.

I was wondering if someone in your office could help me with this small problem.

I own a Commodore and was recently given a cartridge, but with no instructions. It's labelled 'The Final Cartridge' from H & B Holland with a telephone number from which I can get no reply.

The cart has an on/off switch and two buttons marked freeze and reset. I've tried using the cartridge but keep getting two menus on screen (freeze and reset). What's it's function and is it worth keeping?

If so, how can I obtain some instructions. K. Lewis, Bellingham, London

What you've stumbled upon is a reset cartridge. It allows you, upon loading a game, to reset the C64 (via the button) and type in a poke (a cheat for infinite lives, time etc.). This is then followed by a code (an SYS number) to restart the game with the cheat running. I've absolutely no idea about your particular cartridge and due to legal reasons, we're unable to send you a copy of the instructions. Anyway, we can't - we haven't got any!

For several months I've been searching but, in the words of that famous song, 'I still haven't found what I'm looking for

Please can you help me? You're my one and unly hope. You would make my life complete if you could send me one Virtual Reality machine and, if it's not too much trouble, a second one for my brother as he's the jealous type

Many thanks in advance

John Francis, North Dublin, Ireland

PS Some friends informed me there will soon be a Mega Drive/Commodore 64 converter available. If so, when and how much will it cost?

Absolutely, no problem. I'll tell you what, why don't I throw in a nice car, a bijou suburban residence, pretty wife, 2.5 kids and a dog as well — I don't think. As for the converter — wake up and smell the real world, John.

Dear Lloyd, This letter is sent to inform all new readers of your past achievements with Newsfield and Europress. Yes, Lloyd, THIS IS YOUR

LIFE Your Newsfield debut came in February 1984 with the release of CRASH MICRO GAMES ACTION, Your good self and three others (Oli Frev. Roger Kean and Uffindell) had toiled on Issue One since way before Christmas of that year, and all the effort you put in paid off - CRASH Issue One sold over 100,000 copies!

You haven't always been a letters man exclusively. At one point you ran Lloyd Mangram's Playing Tips, Lloyd Mangram's Hall of Slime (highscores), Merely Mangram (previews) as well as the Forum, the Rrap in ZZAP!, an annual look-back (in CRASH) and the odd CRASH History (in words and covers). Then, of course, the infamous 'I nate being photographed, it's almost a phobia' line caused a veritable avalanche of 'you don't really exist and 'Lloyd ...Mangram is a pseudonym'type letters, only increased by thepicture of you with a bag over your head.

After that, the dispute between yourself and Robin Candy, Again, some thought that you WERE Candy, or vice versa and the battle continued for many ISSUES

We now leap to ZZAPI 64, Issue 82, when the unthinkable actually happened - Lloyd Mangram's services were no longer required, letting 'Miss Whiplash' take over. However, a mere nine months later and Lloyd was back, just in time to answer letters for COMMODORE FORCE. We can only presume that Lloyd's reappearance was due to a mammoth amount of complaints by mail and a loss of readership.

To finish, here's a list of magazines Lloyd Mangram has worked on (in chronological

POSITION Dear Lloyd.

With regards to the many letters of last month, (May) bemoaning the lack of stores selling C64 software, might I add my two-penny worth.

DOLE

I am, at thirty-five, more mature than the majority of your readers. I've had a C64 for many years and myself and my two young sons obtain immense enjoyment from it. Unfortunately we're now discovering it increasingly difficult to find a store that stocks any C64 stuff at all. Nintendo yes, Sega yes, even Atari and Amiga owners are well catered for. I've enquired in many shops which used to cater for the Commodore only to be informed there isn't the call for it anymore. Poppy-cock! What they really mean is the profit differential isn't big enough!

My position is this - I'd love to upgrade to an Amiga, but being unemployed I can't! My sons look forward to a new C64 game each month. usually budget, but to them a game is a game. Unfortunately, we can't find a shop with a wide

There it is, the bottom of another mailbag. I can put my feet up at last and relax. My word, that's better. What's that? A letter's arrived, addressed to me, let's see... 'Dear Lloyd, did you know console games cost te...' Aaargh, that's it — blue shirt tails won't affect cable TV this winter,

enough selection! So please, Lloyd, let me plead through your excellent column for store owners not to neglect the C64. Think of all the unemployed who can only afford the £4 or so a month, or the young kids whose pocket money doesn't run to £30-£50 per console game. Have a heart all you computer stockists, don't desert the heart of your market, the good old Commodore 64. I'm sure it'll still be around when the consoles are consigned to the great micro-chip heaven.

Keep up the great work, Lloyd. Stuart Neave, Newton heath, Manchester

I fear you're right about the profit thing; unfortunately, there's very little you or I can do about it. Luckily you can get hold of many great titles through the pages of this very COMMODORE FORCE, many at bargain prices. So don't despair everybody, we'll solve your gameobtaining problems - why not turn to page 64 and ceck out the Plaza...

IIIRBO (C

• Kixx, £3.99 Cassette

Work experience is a daunting task and also quite humiliating; getting spat upon, beaten and being used as a coffee table—you wouldn't think Miles could treat his brother so bad. Still, ROD 'CHARGE-HAND' GUTTERY defied everyone by reviewing this frantic racer. Not that anyone minded — they were too busy connecting his shoelaces to the C64's earth wire...

irst of all, let's get things straight — *Turbo*Charge isn't a driving simulation. It's more of a shoot-em-up if anything, there are no gears, no breaking — just pedal to the metal, left, right, let rip with machine guns affair.

From what I can gather from the (rather good) intro sequence, a UN weapons stockpile has been raided by some low-down, god-damned criminal subversives. Fair enough, so what do you do in response? You take to the road in your turbocharged supercar and break as many laws you can think of — well that stands to reason, I don't think!

Storyline aside. *Turbo Charge* is a smart game, with five different levels each separated into two sections. Each level has it's own backdrop and set of roadside sprites, although some are a totally out of proportion with the rest of the graphics — twenty foot tall policemen with vehicles to match? Hmm...

The sprites that take part in the game are incredible, flawless in design, animation and speed — with helicopter gunships swooping out of the sky, you'll find yourself hiding under a table before you can say yellow matter custard dripping

from a dead dog's eye'.

The drug lords, terrorists and whoever else you care to mention aren't helpless. Not only are there helicopters, but attack jets and other cars give you a proper beating if you let them. My personal favourite is a van that pulls alongside you before a man leans out the window and shoots (ouch!). There's also police cars that stop without warning, to form a rather inconvenient road block. The end of level meanies — although not much different to other road users — take a fair amount of punishment, so save those rockets!

Born to be... stripey?

The road scrolls as smoothly as you could hope for but personally, I'm a great believer that stripey kerbs give a real impression of speed.

The action (with a capital ACTI) is accompanied by a groovy soundtrack that should keep all rockers

othere happy for a while, and the sound effects a of an equally (very) high standard irressive explosions, cringe-inducing tyre seches and your average popping gun sound.

laving said all that, no game is without faults al Turbo Charge has got it's fair share. I've adv mentioned the oversized roadside objects. banother discrepancy is that airborne nasties sattack when you're going through a tunnel or uler a bridge. The most frustrating aspect I dovered during my extensive playtesting (it's a hd life), was that at junctions, one of the two psible routes always leads straight into an uvoidable brick wall — usually there's no ircation of which to take. Sometimes you can fow other cars, but there aren't always ones to

ssentially, this game is good, and when I say gd, I don't mean anything else - because it

would be a waste of time if I did (there's a sensible statement in there somewhere - Prod Ed). It's the little things that count, and Turbo Charge has a lot of nice touches; the incredible variety of assailants, the excellent presentation screens and, of course, the ample credits that ensure you don't have to frequently reload.

Despite my tender years I've come across quite a few driving games in my time, and

this is definitely one of the best a must for any budding Nigel Mansell cum James Bond fan. Having said that, I think driving endlessly into the screen may get slightly monotonous after a while, maybe

lacking

When we showed Milo a copy of the khway Code, he ate it. That's probably y scenes such as the one above cured. Luckily, help was at hand..

Chris (with, errrm, a Halloween mask on his face) managed to aprehend him with a water pistol. Phew - that was close! Pity about the instructor, though.

 This is what it's all about. Rousting along with your foot on the floor, blowing away rozzers, enemy agents and in fact, anyone unfortunate enough to be on the road at the time.

The thing that hits you about Turbo Charge is it's sheer speed, as large, well-drawn scenery whizzes past as smooth as you like. The car handles pretty well too, though forks in the road can be annoying. Take a wrong turn and you invariably end up in a police trap. That's all very well on the first couple of levels, with only a couple of junctions, but later on you'll find 'em coming thick and fast, hardly giving you a moment to think. Despite having couple of reservations, I think this is a

great blast and the best of the drive/shoot-'em-up fraternity to date.

Alternative,£9.99 Cassette

On the outskirts of busy cities lie the suburbs — areas brimming with families of all descriptions. But suburban life is about to change for one family as JAMES 'HOUSEHOLD PET' PRICE is about to find out...

ow can there ever be an accurate movie conversion on the Commodore? A '64 game can't duplicate fantastic special effects, simulate hair-raising stunts — or stay close to the plot in many cases. With Suburban Commando, that's not so much of a bad thing — apparently, the film was awful — but nevertheless,

Hello little red dolphin, you leap so high. There's a big blue missile about to fly up ya bum. Ho Ho Ho! the limitations of everyone's fave 8-bit wonder do pose a problem for programmers faced with such a task.

Those acquainted with Admiral's Dalek Attack will recognise uncanny similarities in this release. Suburban Commando's first level is a horizontally-scrolling shoot-'em-up, although the addition of power-ups and differing attack formations makes it slightly superior to Dalek's similar effort. Complete this, and you're thrown into — no prizes — a distinctly Dalek Attack-style second level. From thereinafter, Commando becomes a platform-based collect-'em-up, rather reminiscent of... no, I won't say it. Fortunately, it's not all bad. After all, Dalek Attack is, although flawed in places, an enjoyable game. Commando is similar in this respect.

Disregarding the first level (it's not worth mentioning), Suburban Commando is essentially a game of collecting items and advancing through multidirectionally-scrolling, platformbased levels. To progress further into the game, various keys and objects need to be discovered (or explosives placed in the first level). This isn't as easy as you'd expect; the game's assorted maps are full of hazards, and there are a plethora of bad guys that do their best to reduce Hulk Hogan's (for he is the hero) life counter. Luckily, an energy bar reduces potential frustration, and assailants can be dispatched by either punching or kicking them. Travelling around the areas is made easier by using the many springs, lifts and conveniently-placed platforms - Hulk can also fall as far as he likes without injury. Key cards allow access to locked areas - more often than not, these lead to the obligatory end-of-level opponents. Hulk has to move quickly if he's to survive against these; they're both bigger and speedier than him...

In Suburbia

Well, time for the critical bit. I wasn't joking about Suburban Commando being similar to Dalek Attack, but that's okay by me — I enjoyed it!

 James wants a good caption for this picture so, just for you Jim — Three big guns, one small ship. I like the odds!

These days, original concepts and gamestyles are too few and far between, so producers can almost be forgiven for releasing re-hashed software - as long as it's good. What does disturb me is that the first level fiasco seen in Attack has reared its ugly head in Commando. I'm all for a little variety, but the average shoot-'emup action does little to complement the rest of the game. It also means more time spent on either disk or - horror of horrors - tape accessing.

The levels are fairly large, with an adequate amount of graphical variation, but what really bothers me is the lack of any real combat. Hulk can punch and kick his assailants, but they're pretty insipid moves - should you hit an enemy, they'll fly off screen in an unusual

 What have they done to Hulk Hogan? I mean, I'm not a fan of his or anything, but he looks like a newborn piglet that's been beaten about the head. The rest of the sprites aren't great either; the majority are all bloated and lacking definition.

As far as gameplay's concerned, Suburban Commando hasn't exploited any new aspect in computer entertainment whatsoever. It's been done before - and a lot better at that. Jumping, kicking and punching is all the Hulkster can do, and there are no big guns or helpful equipment to collect.

Having not seen the film, I'm unable to say anything about the accuracy of the conversion, but if the movie's in a similar vein, don't rent the video.

A missed opportunity? Yes. Barrierbreaking material? No. The final verdict? Platform games have been done a lot better, and even if you're a Hogan fan, this does your idol no favours.

'dying' effect. Also, I looked and looked, but nowhere could I find a projectile weapon of any description. A machine gun or rocket launcher would've made my day, but alas - unarmed combat is all that's on offer. To make matters worse, Hulk looks a particularly unattractive (not to mention sparsely animated) sprite - his moustache seems out of proportion too...

Don't get me wrong - I enjoyed playing Suburban Commando, but the entire

game has an air of 'nearly, but not quite' about it. In fact, to summarise, I'd compare it with a tuna fish sandwich without enough onion and mayonnaise. I'm eating one as I'm writing, and there isn't enough, you know. That's not to say I'm not enjoying it - I am, in fact but

bit better

Terrible wages? Awful hours? Stuffy working conditions? Life's difficult when you're a journalist. JAMES 'OH FOR A FACTORY LIFE' **PRICE laments** the day he chose to work with words and not production lines...

s of late, game giants Kixx have founded a new mid-price label called Kixx XL. What does the XL stand for, though? Extra Large? Their release packaging is on the hetty side. Xtra Loading? Well no — they're mainly disk based so tedious tape accessing isn't something you'll come across. The more astute among you will notice that Night Shift has been released on both Kixx and Kixx XL labels. The reasoning behind this is beyond us but NS on cassette is a mere Kixx game, whereas the more advanced disk version is... need I insult you by explaining further? From one strange extreme to... erm, another

From one strange extreme to... erm, another strange extreme, Night Shift is what I'd term as both original and unusual. Originally released by US Gold, it's a game of factories, dolls and unreliable mechanics and if I had to categorise and attribute it to a specific genre, I'd say it was an arcade puzzler. As much as I hate reiterating storylines, it would appear I'm going to have to in this instance. Darn.

Industrial Might and Logic own the rights to produce toys based on popular (and not so popular) Lucasfilm characters. From Star Wars to

other unforgettable epics (their names escape me... oops!) the leading stars are reproduced in cuddly plastic. That may seem to lack soul to you or I (plastic figures indeed!) but to the boardroom giants, they provide a hefty profit. However, being the tight-fisted and heartless moguls that they are, they'll only pay one willing sucker a measty amount to supervise and ensure trouble-free production. Ahh, thank the Gods, for my personal hell can be switched off whenever I please. Ironically, Night Shift is so good to play I don't want to switch off! Fixing bits and bobs along the production line is really neat and even though the problems are frustrating, you won't give up in a hurry. If only the tasks weren't hidden so much in the background

affectionately named The Beast. It's a cantankerous machine at the best of times, and things often go wrong unless it's given careful to the route they fall from the multistory production line has to be manipulated; rather than presenting this as a continuous task, the game's split up into separate levels of increasing difficulty. At first, these involve avoiding hazards on the shop floor and flicking the odd relevant switch; later on, complications such as a multitude of confusing body sections and their assembly do a great deal to confuse a poor factory worker.

Shifting the scene
Night Shift is a platform game gone wild. The play area is approximately eight screens high and one wide and although that may sound a little small, uninteresting it ain't. There's always a lot to do; from powering up The Beast with a pedal bike, to floating to the ground with an umbrella it's a madcap occupation. The problem is, there's often too much to be getting on with! Frustration reaches epic proportions when your latest batch of Luke Skywalker dolls come out with ears for feet and thighs for heads. Night Shift isn't a game

If you're looking for something new, this is your game. The refreshing not-too-linear gameplay allows many a fun-packed hour of wanton doll than you'd expect. It's good to look at, sounds okay and even the presentation's acceptable — it's all too good to be true. It even has a none-obtrusive multiload, with five levels being loaded frustratingly difficult at times, and I'd advise younger players to steer well clear.
Well that's the review in its entirety. You may

Well, we couldn't help ourselves. Last month we brought you the first instalment of the Batman Diary. This month we decided to go one better, and bring you the gossip on Lemmings as well, courtesy of its programmers (Alter Developments). So, here's the Work in Progress section - we hope you find it interesting and informative. Oh, and there's a mystery prize for anyone who can suss out Roy Bannon — he's a complete loony.

The Programmer

THOMAS MITTELMEYER is the guy who manipulates all the bits 'n' bytes in the right order to ensure those Lemmings walk across the screen.

THOMAS: After long (and tedious) discussions with the rest of Alter Developments, we all agreed that I was the best man to do the job. The first thing I did was try out different ways of scrolling the background. I made six demos and then chose the best one - a sprite multiplexer for the background, with the Lemmings 'bobbed' in characters. This method of scrolling enabled me to have 100 of the

to include the 'LET'S GO' and 'OH NO' furry fellas walking around

at a reasonable speed, but on the other hand this meant the actual playfield would only cover half the screen - it's impossible to have more than eight sprites alongside each other. Having chosen this way of scrolling, I started to program the bobroutine using Lemmings converted from the original Amiga game. When I got them walking, I finished six demo versions which were sent to Psygnosis. When they saw how brilliant the demos were, they offered us the contract - you could say I was one of the happiest men on the globe.

After this brief moment of joy, I had to return to reality and consider the daunting task of creating Lemmings on the C64. My biggest enemy was the memory. Try and fit in 120 animations, background graphics, music and sound effects into 64k of memory and still have space for your code somehow, I've managed to do so. All the animations featured in the Amiga version can now be admired on the C64 version as well.

Unfortunately, not everything from the Amiga version could be retained - the level size for example. In the 16-bit version of Lemmings, the levels can be up to five screens wide. You could do the same on the C64, but the five screens would fill up the entire memory - so each level had to be reduced to a maximum of two screens. On a more positive note, I managed to save enough memory

Another problem was speed. I needed a routine that would enable 100 Lemmings to be on screen and check whether they were climbing, digging, blocking, or any of the eight functions they're able to perform, as well as their basic movement - they had to be walking and falling at a reasonable speed too. This was probably the biggest reason for me to choose the sprite-scrolling method, as this doesn't slow the computer down as much as the usual scrolling method.

The biggest help with programming Lemmings was my computer set-up; instead of using only one C64, I linked two together. In the past, I've connected the C64 with a 0-modern link, programming on one and transferring the data to another, to see the result immediately. Nowadays, I've got rid of the cable and use my only working disk drive (the one Remi gave me doesn't work properly) as source for both computers. It's much faster to save the data from my programming computer to the drive, then switch to the test computer and load the data from the drive. Another big help was the turbo assembler Jereon Tel rewrote. Instead of the usual 4000 lines, this assembler enables you to program up to 8000 lines and is still compatible with my computer linkup (coz Jeroen uses the same one). You might

wonder why this turbo assembler can handle

twice as many lines as any other - well that's the down side of it. Jereon removed all utilities which can be found in 'normal' assemblers. With the Lemmings code already exceeding 5000 lines, I'm glad that JT made this editor - otherwise, it'd take me even more time to program all those routines.

But hey, I've been having great fun being the one responsible for programming Lemmings (especially when the cheque arrived). It's the best project any C64 programmer could wish for. Everybody said it was impossible, and voila! I'm making it possible!

The Graphicer

The second man employed on the Lemmings project was NIKAJ EIJK - he was to be responsible for all the pixels drawn in the game. the one who shapes the Lemmings and the assorted backgrounds.

NIKJA: When I was asked to do the Lemmings graphics by Alter Developments, I was delighted to have it as my first BIG project. Until then I'd only drawn graphics for some budget games. All the graphics are converted from the Amiga version by Remi, and we were lucky in that the 120 animations came through very well, only requiring some minor patching up. Due to the different graphical resolutions between the C64 and Amiga, such animations tend to become unusable after they're converted. But everything worked brilliantly - the backgrounds being somewhat bigger, transferred particularly well.

The first thing I did was to create a library with

all the recuring objects and animations as the entry and exit points. With these completed, it meant I could focus on the backgrounds more - there was a lot to work on. Rocks, columns, bricks and other stuff needed to be created - and created well.

Problems occured while re-designing several levels. On the Amiga, levels could be up to five screens wide, while the maximum the C64 could cope with was two. Because of this, I had to cut out all the unnecessary parts and if the levels still exceeded the maximum of two, I had to redesign and make sure the solution would be the same as the original Amiga level. I found this a real pain with some levels, but luckily most of them could be compacted onto two screens. Animation presented another dilemma, as the C64 screen is built up with characters. Each character is 4 pixels wide and 8 pixels high, the screen is 40 characters wide and 24 characters high. I needed to draw the animations pixelperfect so they'd fit exactly into a set amount of characters. If not, it would be impossible to include all the animations. This isn't merely necessary for the water and lava, but for every single moving object - such as traps and the entry and exit-point graphics. I can remember drawing several levels and when finished I'd tested them, only to find that several items were placed wrongly and had to be moved several pixels. This sort of thing gets really annoying especially when you've just finished a difficult level. Speaking of difficult levels, I found the fire and lava stages the most taxing to work out. I only had three colours at my disposal (I needed at least four or five) but I tried my best and I'm quite proud of the result. Another annovance would be the amount of times I needed to alter a level. Every time I finished a stage and passed it over to Thomas, he'd call me to make some 'small' adjustments. Sometimes, I'd get handed a level back three or more times. The biggest slip-up was when we actually got to playtest 15 levels put together for the ECTS in April. I used black in the backgrounds as a fourth colour, to give extra 'dimension'. However, Thomas programmed the Lemmings to fall down if they walked over a black spot, so the result in some levels was that the Lemmings got stuck in the background, due to my usage of colour. Rectifying that little error was the hardest task of all. Thankfully, the demos were accepted very well at the show and the whole of the Psygnosis crew were very impressed.

My favourite stage is the BEAST level. Here. instead of the usual Lemmings screens, I used graphics from other successful Psygnosis games - one of them being Shadow Of The

Beast. This refreshing graphical style makes for a very special level.

At first, I found Lemmings to be the ultimate project, but now I've worked myself halfway through it, I've realised it's also my most challenging project to date, especially considering the limitations I've got to work with. Still, I think I'm doing a great job, and I'll gladly finish it.

As Alter Developments didn't have a musician. we enroled another freelancer to work on the Lemmings project. And who would be suited better than JEROEN TEL? Jereon accepted our offer, so everything you'll hear while playing Lemmings will be done by the master himself.

JEREON: When Remi asked me to do the music for Lemmings, I was working on a CD featuring Nintendo game music. I've been working on it for months, but took a break especially to do the Lemmings music, and I've been doing it with great relish - I didn't see much of a problem in adapting the original Amiga music and converting it to the C64. I'm trying to make the music as cute as the Amiga tunes, but I trying to make them 'funkier', as I feel the simplistic style of the Amiga wouldn't quite have the same effect on the C64 although I'll try to keep them as sweet as possible. One thing's for sure - it's going to have that 'MANIACS OF NOISE' touch, like my other soundtracks have. Another point is that I'm limited to using the SID chip sounds on the C64, as well as having to compensate for other '64 limitations (or possibilities, as I would say) in speed and memory. However, recently I was 'given' some extra memory by Thomas for the sound effects. This enabled me to use digital SFX, such as the famous Lemmings samples - in particular, 'LET'S GO' and 'OH NO!' throughout the game. This means the sound effects are combined SID-sounds as well as digitised sounds.

When I'm making game music, I try to adapt it so it enhances the game as much as possible. In my opinion, the correct music and FX make half of the game. If both are linked perfectly, it makes the end product so much more playable. We all know how irritating bad music can be, or even worse... bad FX. Instead of turning the music off, I'll try to make you turn it up louder.

I've done a lot of music, for a lot of BIG titles, but you can only wish for a title such as Lemmings. It must be the most eagerly-awaited game on the C64 at the moment, and I'm so pleased that I'm doing the music for it!

Next month the diary continues with another in-depth look at programming pleasures and pains as more stages of Lemmings near completion. Well, that's what's supposed to be happening, anyway. Fingers crossed, eh readers?

BATMAN

apow! Whammo! These are just a couple of words you won't be seeing in any version of Batman Returns. Young boys in green stockings won't get much of a look in either. To compensate, however, Level Three features a certain female dressed from head to toe in clinging black leather.

'Life's a bitch and then you turn into one' said Salina Kyle aka Catwoman. I like to think 'life's a bitch' and then start coding one. The difference between turning into a super-baddy and talking to invisible armchairs is not as great as one may think. Selina had it easy; falling from the top of a tall building and getting resuscitated by cats. Compare that to my tapping at a keyboard wondering what topic Sammy (invisible amchairs are called Sammy as a rule) has thought to talk about when I get home. You won't catch me complaining though — not unless you try anyway.

I think it was Bertrand Russell who said 'If Cartesian dualism is by definition remote in terms of perception then I'm a monkey's uncle'

Not very profound and not at all related to the matter in hand.

Ok I must

admit it. I didn't think my map data out properly before Paul started on the graphics, and when I eventually got them going I was way out of memory. At such times your best bet is to not panic - make a strong cup of coffee, sit down with a pen and paper and try to find a way around the problem. When this fails I pick all the lads brains to see if they've got any good ideas. Some of the printable suggestions were 'Give away a free PC with every game' (Tony) 'Compress and decompress the map - that's 'Have a Spicy Stick' (Paul T). I considered each one on its merits, then implemented my own master plan - to have another cup of coffee. As it was such a brilliant idea, I decided to go with it for a while and had several more. A few hours later - after I'd stopped running around the office gibbering hysterically - I came to the brave decision to change the block size. This meant the map could be stored in a quarter of the memory, although the blocks would take up to four times as much space as before. That was easily solved - I got Paul to use less blocks! He had to redraw the whole map anyway, so I thought it was a reasonable enough request.

Of course I had to redo my print to handle the new block size so it wasn't a

completely biased decision.

It's Collision Data Entry Time! This is a game for one player whose task it is to type in lots of data like \$6EF, \$72C, \$220, \$228, \$TAIRS in as short a time as possible whilst holding on to their sanity and retaining as much visual capacity feasible. No conferring, your time starts now....

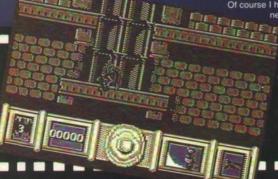

The average programmer takes about four hours per platform and a partially trained mongoose takes no time at all 'cause it's got enough sense not to play in the first place.

When's a platform not a platform? When it's thought up by an artist. Stairs are all very pretty as are sloped roofs, but give me a flat platform any day — left, right, top and bottom edges will do nicely.

I could really do without stairs. To make them, I have to create a box that surrounds the whole area, figure out how far from the left edge Batman is, add this onto the bottom of the stairs and see whether this value for the vertical direction is where Batman actually is. If all works out according to plan he's able to scale the stairs.

scroll, it was time to concentrate on Catwoman. She had to be smart to give you a tough time on this level. This means I had to simulate intelligence that took several million years of evolution in less than tens of thousands of years of C64 processing.

of C64 processing.

The code had to be quick, and the best way to get code to run fast is to work it off data which avoids having to make lots of complex decisions. Unfortunately, there was no memory left for huge amounts of data, which meant I was going to have to use some higher brain functions — never an easy thing at the best of times. You couldn't hear me complaining, though — not if you were wearing ear muffs, anyway.

Catnip

Despite Catwoman's early insistence on not moving (I'd forgotten to take out the bit which changed her screen position when I was setting up her sequence) the game was shortly afoot. Platform collision data was already in, and the code written for Batman needed only a little modification for use with the cat herself. In no time at all — well, a day — Catwoman was merrily hopping from platform to platform following a preset route I'd given her. Next, she had to chase Batman and harass him at any

time — this wasn't easy. First she needed to move toward the platform Batman was standing on by walking left or right. Secondly, she had to jump if Batman was above her. Thirdly, she'd drop down if Batty was below her — if the platform he was standing on was smaller than the one she was perched upon, she needed to walk left and right looking very confused. Following this I had to make a cup of coffee and wander around sulking, before actually sorting the situation out. There were many things to consider — a particular problem was working out how to get her to jump onto a series of successive platforms in order to reach Batman. It took four days to get this sussed so imagine how long it would take me to explain it. I won't bother if it's all the same to you.

In the beginning there was nothing. Space and time simply didn't exist — a tricky concept, but take my word for it. Then lots of stuff happened — far too much to chronicle in this short space — which brings us nicely to the present day and avoids quantum physics, molecular biology, evolution and the concept of soul which aren't the easiest things to get your head round either. Tuesday's a tricky day — a sort of watered-down Monday with subtle hints of Wednesday and a barely perceptible aftertaste of Sunday. Just one

more day in the exciting life of a computer games programmer. Where was I? Oh yes, I was on the previous sentence. Caffeine is a very

Giant Haywire Stacks

Let's talk Bugs. When everything goes completely haywire for no apparent reason, almost instantly you'll find half a dozen programmers standing behind you rubbing their chins in a vain attempt to appear knowledgeable, saying 'Look's like a stack problem to me' or 'ls it your stack?' or 'l think it's the stack' This is not so bad if you're busy writing a computer game but if you're in the middle of an exam it's very annoying. It was, of course, the stack — one PLA too few, or one PHA too many, depending on your outlook on

You awake with a headache and blurred memory of events leading up to your present predicament. It seems that you've been abducted by callous thieves who've left you tied up in a strange mansion. The thieves have left their swag hidden about the place; you have to free yourself and find it. It's rather a strange plot, but one which sets the

seeking help wouldn't go amiss in our Bashing For Beginners series. All of us, at some point or another, become completely stuck in an 'adventure — unless, it's a Ireally easy one. I consider myself something of an expert adventurer, with hundreds of completed titles under my belt. However, I have to admit that in almost every game, I've needed some help to overcome what seemed to be an insumountable problem. From personal experience, I can tell you there are some methods of obtaining help that are definitely taboo. One way to completely ruin your

enjoyment of an adventure is to immediately send for a full solution. Unless you've the willpower of a stone golern, you'll find that having the solution at hand has the strange effect of preventing your brain from functioning properly. That is, you suddenly find yourself unable to concentrate on solving a particular problem for yourself. Gone are the frustrating hours of trying one thing after another until you come up with the right answer, instead, you find yourself thinking 'Well, I have the solution so I'll just have one little peek but I'll do it all myself.' Believe me — you never do! To find out about a particular problem, you need to search through the entire solution, reading the rest of the answers in the process — be warned, 99% of players who have a solution at hand will inevitably do this. It's not at all satisfying completing an adventure in this manner.

an adventure in this manner.

Trying to cheat the adventure into giving needed information can be a most entertaining business. Not only have I tried the strategy of typing in DROP AXE, SCREWDRIVER, ROPE and all the other type of cheats I've previously mentioned, but I've even written programs that search out the ASCII contained within adventures and print them, allowing me to pick out any sentences or words that might provide a clue when I'm stuck. We all try and cheat in one form or another, but it isn't the correct way to go about

The puzzles range from the fairly easy to the downright difficult. Negotiating entry and exits to the secret passages and figuring out the problems drove me round the bendl Getting out of the first location can be a bit tricky, but some

thorough examination of objects soon gets you going, leaving you with a huge mansion to explore at your leisure.

There's a certain 'polish' to Heist, showing a great deal of thought, care, and attention to detail has gone into the design and programming. You can easily find some loot and think it's time to escape, but the real challenge is in finding the ten well-hidden

pieces of treasure the thieves have cunningly concealed — that's where all the fun is to be found. Oh, and while you're exploring, your memory starts to return too!

This is the stuff *real* adventures are made of and one which I would heartily recommend.

The best way to go about getting help, is to either write to

or telephone an adventure helpline.
Those on the other end of the phone are experienced adventurers, who are able to give you the help you need for a particular problem. They're experienced enough not to spoil your enjoyment of a

experienced enough not to spoil your enjoyment of a game, but professional enough as to halt your cries if they find they're solving the adventure for you. It's happened to me plenty of times. I've given a poor, lost soul some help to get started, and then half an hour later they ring back asking for advice with the next bit.

Calling a fellow adventurer for help and a little encouragement can be most rewarding too, as you soon become firm friends. I've made hundreds of friends over the years through exchanging correspondence and telephone conversations relating to adventures.

For those of you sitting at your keyboards in frustration not knowing another adventurer, you may be wondering where on earth you can find a helpline. Well one of the best ways is to subscribe to an adventure fanzine, as there's usually a list of helpline addresses and telephone numbers listed inside. Fanzines that I can definitely recommend include Adventure Probe. The Goblin Gazzette, The Adventure And Strategy Club and Red Herring (see Contact Point for the correct mailing addresses). It would be well worth your while sending off for details or a sample copy to see what they're all about. Adventure Probe, for example, always carries a veryextensive telephone helpline page.

Very extensive telephone neipline page.

Pillip Wilson of Bristol would like to know if ther's anything he needs to get from the ship before it blows up, and if there are objects he needs from the escape pod in Planetfall.

The only thing you need to consider when in the shipis 'Agrh! Run away' — basically, get the heck out of there. You should take the Survival Kit from the Pod.

It's time to extinguish my torch once more and sharpen my quill ready for next month's writing. Keep chiseling at those letters and may your crom forever be well.

I'm sure someone will correct me if I'm wrong, but I don't think you can buy *The Quill* these days. Try the In-Touch column in **Adventure Probe** magazine.

The Quill and GAC are, in my humble opinion, equally as good. I find GAC a lot easier to use, but both systems are quite easy to get to grips with once you've followed the basic tutorial.

Margaret Lawrence from Dudley is puzzled by the Newspaper and the Binoculars in Beatle Quest

Well, you may find this hard to believe, Margaret, but if you take the newspaper you can MAKE TAXI to get some transport! Give the Binoculars to the Girl with the Kaleidoscope Eyes. Peter Williamson of Manchester is completely stumped by the boulder in *Desert Island*.

I suggest you tie the rope to the harpoon and fire it — that should help you overcome the problem (as obscure as it may sound — Ed).

Janet Arundel of Colwyn Bay is stuck on the lovely 'golden oldie' adventure, Mordon's Quest. She just can't find the answer that Tarzan's question.

Carefully draw a map of the jungle area and stand back and study it. What kind of amorphous creature does it look like? Doesn't it look rather like something small, green and slimy that lives in ponds and croaks?
